

Robin Class Home Learning Ideas

Summer Term 2026

Here are some ideas to extend your child's learning at home. Please do as much as you would like and share with us at school.

Find out a fact about another country and share it with the rest of the class.	Draw a character from a favourite story. Or you could build a model using lego, junk, found materials...	Can you think of a different ending to a favourite story? You could make a little book with your own ending and add some illustrations.
Practise your ball skills (catching, throwing, kicking, passing, rolling or with a bat).	What numbers do you see on your way to school? What do you notice about the numbers in the streets on your journey? Which are odd and which are even? What are the greatest numbers you see?	Help to tidy your things away at home. Can you write and draw labels to help you put things away?
Practise the number bonds to 5 and 10. Use your fingers, counters, or any objects. Can you count in 2s, 5s or 10s?	Share a song we sing at school with your family. Learn a song at home and teach it to us in school!	Choose something to bake at home. Can you write a simple recipe for us to use? Tell us about it in school.
